

BRIAN MUNENE MWIRIGI

Full-Stack Developer • Aspiring AI/ML Engineer • Developer Tooling

Nairobi, Kenya | brianinesh@gmail.com | brianmunene.me | github.com/brian-mwirigi

PROFESSIONAL SUMMARY

Full-stack developer and aspiring AI/ML engineer with shipped projects spanning SaaS platforms, developer tooling and AI-powered systems. Technical lead on CropChain an AI credit scoring API incubated under the UN Global Compact's PRME Innovation Studio currently at the Semi-Finals. Builder of open-source CLI tools with 7,000+ downloads.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend: Python, FastAPI, Flask, Node.js, SQLAlchemy, REST APIs, PostgreSQL, SQLite

AI/ML: XGBoost, Scikit-learn, Pandas, NumPy, Open-Meteo API

Tools: Git/GitHub, Docker, CLI development, npm/pip, Chrome Extensions API, Vercel, GitHub Actions

KEY PROJECTS

CropChain - *Python · FastAPI · XGBoost · PostgreSQL · Sentinel-2*

- AI-powered credit scoring API for smallholder farmers, incubated under the UN Global Compact's PRME Innovation Studio 2026
- Integrates various data sources for field-level crop health assessment
- XGBoost model trained on Financial Inclusion in Africa dataset (AUC-ROC ~0.70) with Open-Meteo weather integration
- Production FastAPI backend with async SQLAlchemy 2.0, PostgreSQL via Docker, and API key authentication
- Designing marketplace architecture connecting farmers to MFIs; Railway cloud deployment in progress

codesession-cli - *TypeScript · Node.js · npm*

- Open-source CLI tracking AI-assisted coding sessions including time, files changed, git diffs, and token costs across providers
- 7,000+ downloads on npm; uses file system watchers and git process spawning to capture sessions automatically
- Compatible with Claude Code, OpenAI, Google, and any agent framework

Chrome Extensions - *JavaScript · Chrome Extensions API*

- AI Slop Blocker (366 users) - filters AI-generated content from browsing feeds
- Twitter Thread Downloader (114 users, v1.6, rated 4 stars) - full thread download tool
- TikTok Video Downloader HD (226 users) - no-watermark video download extension

E-commerce & Landing Page Portfolio - *React · JavaScript · CSS3*

- Built quality sites for diverse industries through Breon Studio
- Prototypes include luxury retail, hospitality, creative agencies and local Nairobi businesses

Developer CLI Suite - *TypeScript · Node.js · npm*

- aitoken-cli: unified dashboard normalizing AI API token costs across OpenAI, Anthropic and Google
- apisnap-cli: HTTP proxy capturing live API traffic and auto-generating Jest tests and MSW mock handlers
- devmem-cli: persistent cross-project code memory giving AI assistants context across entire codebases

Volvox Bot (Open Source Contribution) - *TypeScript · React · Discord.js*

- Contributor to VolvoxLLC/volvox-bot, an open-source Discord bot platform with a web dashboard

- Merged PR #305: improved dashboard UX structure and reduced UI clutter (frontend)
- Merged PR #181: implemented protection logic preventing moderation actions on admins, mods, and owners

EXPERIENCE

Co-Founder & Lead Developer | *Breon Studio* 2026 – Present

- Two person web development and design studio building production websites and digital products for clients in Kenya
- Manage full project lifecycle: requirements, design, development, delivery, and ongoing maintenance

Full-Stack Developer | *Freelance & Contract Work* 2025 – Present

- Self-managed remote workflows with consistent delivery and clear stakeholder communication

EDUCATION

BSc Computer Science | *Strathmore University, Nairobi* Expected 2029

Software Engineering Certificate | *Moringa School* 2025

Full-stack development bootcamp - React, Python, Flask, PostgreSQL

ADDITIONAL

- Available for part-time remote engagement (20–25 hrs/week)
- 897 GitHub contributions in the last year; active open-source contributor
- Fluent in English; comfortable with async communication and self-managed workflows
